

Seed catalog Bush Beans

North America

Focus is in our genes.

Front runner

Combining over 60 years of experience with innovative technology gives us a leading edge in bean seed breeding.

Sustainable growth
We export our
vegetable seeds
to over 100
countries around

the world.

William Liggitt
Technical Bean Advisor

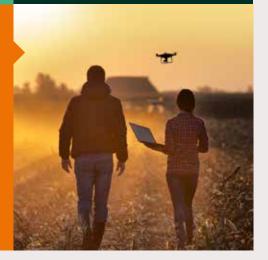

In it for the long term
We innovate
with a long term
perspective,
together with
our clients.

Super specialist
We focus on a
limited number
of crops in which
we strive to be a
top 3 player.

The power of partnership
Our passion for great
genetics combined
with KWS's superior
technology already
delivered some
great results.

Magma Collection

 $\begin{tabular}{ll} $\#$ & Recommended for processing market \end{tabular}$

% Recommended for fresh market

We combine state-of-the-art innovations with our long term experience. In the spotlight.

Lunar The Magma Collection®

High percentage peduncles

A very sturdy erect plant habit with uniform dark green pods. Specially bred for the fresh market segment under hot growing conditions.

Pelican The Magma Collection®

High heat tolerance

Farmers first choice for growing fresh market beans during the hot season. Uniform pods in sieve size and length.

Sanford The Magma Collection®

Strong vigor

Widely adaptable, especially under mid winter growing conditions. Sanford produces dark green, uniform pods.

Memphis

Strong and erect plant

Thick and fleshy pods with an excellent medium dark green color. This variety has an excellent yield potential.

Jaguar

Long fleshy pods

Widely adaptable and heat tolerant. Outstanding plant type with long fleshy pods and an excellent shelf life.

High yield potential

A 4 Sieve wax bean with uniform, straight and true yellor pods. This variety shows good levels of Bacterial Brown Spot tolerance.

POP VRIEND SEEDS IS A SUBSIDIARY OF KWS VEGETABLES BV

Figures and information in this brochure are based on the average results of large scale plantings under North American conditions and may vary with local environmental and agronomic conditions, grower skills, microclimate and soil structure. Resistance is the ability of a plant variety to restrict the growth and development of a specific pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure.

Pop Vriend Seeds does not accept liability based on the information in this brochure for deviating results in the cultivated product. Buyers and users of Pop Vriend Seeds varieties are responsible to determine suitability of the seeds to intended cultivation and local circumstances.

All contracts for delivery of goods are subject to our general terms of sales and delivery, which you can download from our site www.popvriendseeds.com. You can also ask for a copy by e-mail via info@popviendseeds.nl.
